

Product Specification - Cat 6A UTP patchcord PVC/LSZH

NextGen Patch Cords have been designed for high speed data transmission over local area Networks (LANs) and for Gigabit Ethernet 1000Mbps applications. These cables exceed performance requirements specified by the TIA/EIA-568B.2 / TIA/EIA-568C.2 and IEC 60603-7-4 standards. Avalon cables are ideal for simple, cost-effective and high-speed transmission performance. They support a higher signal- to -noise ratio, providing better reliability for current applications and higher data rates for future applications. These Patch Cords comprise of a flexible patch cable and terminating with two modular plugs along with molded boots.
